

# Dog Kennel

*Boston, Massachusetts*

## Project Highlights

Finished building allowed a thriving dog daycare to continue.

Building required special attention to details for K-9 occupants.

Building exterior view, right, and interior spaces, below.

## *Your Project, Our Role...*

Designed by B. Goba & Associates, P.C. for a private client, our firm provided contract documents for the facility. The building was constructed by others under a separate contract.

Dog daycare buildings require special attention to K-9 needs. From special air filtration to easy to clean flooring, we worked with BGA to design this structure from scratch. The final design was a pleasing facility which continues to thrive.

The Preservation Collaborative can provide an array of services to clients including the creation of contract documents. These valuable drawings allow builders to price out a project accurately, or receive a permit from the local building department. They help convey the design message at hand.
