

Salem Witch House

Salem, Massachusetts

Project Highlights

Salem Witch House is a National Historic Landmark.

Work complied with the Secretary of the Interior's Treatment for Historic Properties.

Work provided critical AAB/ADA access into the historic museum.

Front of the Witch House, right, and views of the exterior ramp, below. Work also involved interior alterations.

Your Project, Our Role...

Built after 1670, the Salem Witch House is the only structure with direct ties to the 1692 witchcraft hysteria.

Working under B. Goba & Associates, P.C., our firm assisted BGA with contract documents, field assistance and documentation during AAB/ADA renovations to this sensitive structure. The project was completed in two phases and required the approval of the Salem and Massachusetts Historical Commissions.

The Preservation Collaborative's diverse background allows clients from small museums to municipal managed structures to receive the same level of attention and care for any sized project. We are knowledgeable in the challenges clients face with aging buildings and are ready to tackle any problem, headstrong and in a methodical manner. Let us help you get started today!
