## Your Project, Our Role...

The Preservation Collaborative and Historic Connection researched the circa 1910 Henry Upton House for the homeowners.

Henry J. Upton was a successful pen manufacturer. Holder of several improvement patents, his quality products were well known throughout the country. He built this house new around 1910.

This report included a deed search, historic photographs and records.

The Preservation Collaborative has extensive knowledge in researching your historic home.

Our consultants have key understanding of local repositories. We can efficiently research and decode a building's past. With the addition of physical analysis, we can help you learn everything about the historic past life of your most valuable asset.
