

Wakefield Vacation House

Wakefield, New Hampshire

Project Highlights

Building was designed as a traditional Cape with new features built in.

Maximized space in a small footprint.

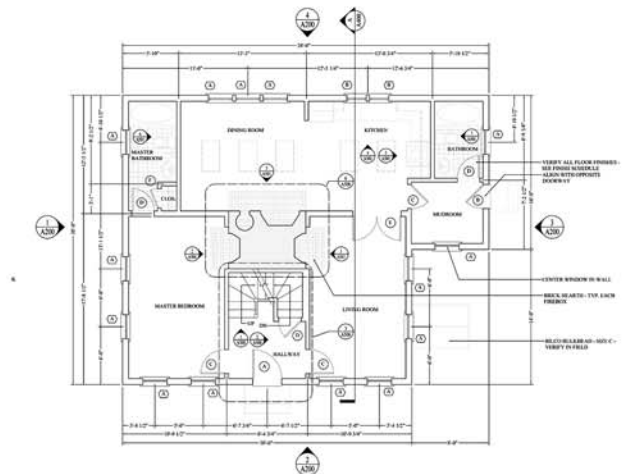

Used a central hearth as a predominant feature.

Building was rendered for homeowners to walk through the building before it was constructed.

Three quarter view (right), detail shot and floor plan of the proposed building (below).

Your Project, Our Role...

Landowners in Wakefield, New Hampshire, wanted a small and traditional vacation house. Our firm designed a Cape Cod style structure from scratch.

This new old building incorporates many historic features including a central chimney, cooking hearth and floor plan. New elements, such as a master bathroom, kitchen and skylights juxtapose against the historic flavor. The finished house was a blend of old and new.

Our firm designed this building from start to finish. We worked with site information provided. We sketched a building layout which was eventually turned into construction drawings. Finally, we detailed the details to ensure a successful project.
